PROFILE

Full stack web developer who recently earned a certification from The University of Texas at San Antonio and who is excited and ready to make a impactful presence on a fast-paced and quality-driven team. The combination of my passion, adaptability, and curiosity makes me an ideal candidate for any team.

TECHNICAL SKILLS

Front end: React.js, HTML, CSS, Bulma, JavaScript, Bootstrap, Handlebars.js.

Back end: Express, MongoDB, MySQL, JavaScript, Node.js, Sequelize ORM, Mongoose, and building RESTful based API's.

Tools: Heroku, Git, Insomnia, Workbench, and Studio3T, Chrome Dev Tools, Light house.

PROFESSIONAL WORK EXPERIENCE

Area Manager, PC Logistics LLC   Midland
Apr 2017 — Jul 2021

Managed a large client base of 12-23 businessmen provided 24/7 service to clients. Also scouted for prospective clients. Dispatched trucks from the working yard to the fields.

Technical Support Specialist, Apple
Sep 2021 — Apr 2022

Resolved issues involving locked Apple accounts, stolen or broken devices, and returned items. Worked independently and self-managed in a fast-paced environment while implementing company policies and procedures.

PROJECTS

CCR Web Development Webpage

The logo, color, layout, and color scheme of this website were designed by me for my own freelance company. With my design, I was able to create something that was both user-friendly and visually pleasing.

Technologies used

- HTML
- CSS
- Bulma CSS
- JavaScript

Code

https://github.com/iyanez2314/CCR-website

Deployed site

http://www.ccrwebdesign.com/

Paw Walkers

Paw Walkers was built with a few of my classmates during my certification of completion. We all have dogs and sometimes we get too busy with life to walk them and that's OK! so we created a site for people like us to schedule appointments with paw walkers. You can also sign up to become a paw walker yourself.

Technologies used

Front end

- JavaScript
- Bulma
- Handlebars.js

Back end

- Custom RESTful API's
- Express
- Node.js
- MySQL
- Sequelize ORM

Discord bot

This discord bot was built entirely by me this has been something I have always wanted to build. This bot is meant for owners of a discord server to implement an easy way to check the stats of a certain user. This is something I am working on daily and implementing new features.

Technologies used

Back end

- Node.js
- Discord.js

Code

https://github.com/iyanez2314/COD_DISCORD_BOT

E-commerce backend

This is a fully functional E commerce back end. Using this RESTful API, you can create your own products with categories and tags. Any existing products that you have on the API can also be updated or deleted all items are stored in a MySQL database.
